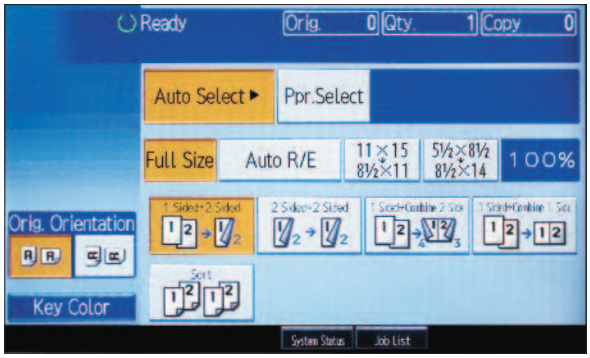
savin

All the Resources You Need in One System.

Wouldn't it be nice if you could expand your digital imaging resources without expending your budget? The Savin 9040b & 9050b Digital Imaging Systems let you do exactly that. Now you'll have the flexibility to maximize production with output speeds of up to 50 pages per minute, conserve IT resources with advanced network printing and monitoring capabilities, and save time and money with Super G3 and Internet faxing.

Confidentiality is ensured with unsurpassed security, and documents are finished easily and professionally. These systems also streamline document distribution with the black & white scanning capabilities of the 9040b & 9050b.



The large, 8.5-inch color touch panel lets you choose from normal or simplified display for maximum visibility and easier operation.

The Resources You Need to Drive Productivity.

The fastest way to get more done is to have the right resources at your fingertips. The Savin 9040b & 9050b systems easily put functionality and flexibility within your reach.

- Boost production with up to 50 black & white copies/prints per minute.
- Take advantage of cost-free document distribution, storage and versatile scanning capabilities with the Savin 9040b & 9050b.
- Save time with up to three Super G3 fax lines and eliminate long-distance phone charges with Internet fax capabilities.
- Impress internal and external customers with crisp 600 dpi resolution and 256 gray scale levels.
- Increase your processing and storage capabilities with up to 512 MB RAM and an optional 40 GB Hard Disk Drive.
- Put the final touch on your documents with three different finishing options, any one of which will add a professional look to your documents.

Scanning: The New Standard of Convenience.

A variety of sophisticated yet user-friendly scan functions makes document distribution cost-free and convenient.

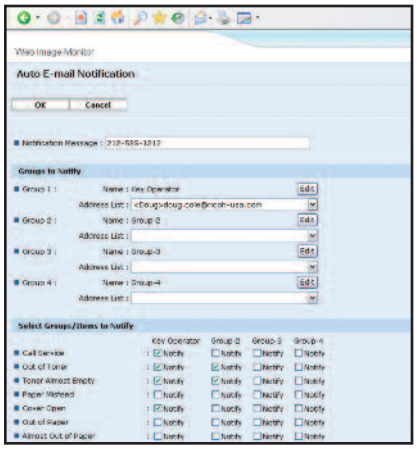
- Eliminate postage and overnight delivery costs via Scan-to-Email, with the black & white scanning capabilities of the 9040b/9050b. Plus, access your company's LDAP directory to maximize the use of existing company information and ensure accuracy.
- Save physical space and time when you convert paper copies to electronic files and store them in a network folder with Scan-to-Folder—you no longer have to detach documents and save them electronically. Not only will you be able to easily find and retrieve files, but designated users on your LAN or WAN can access, review and update the files as well.
- Ensure that you've captured documents accurately using the Thumbnail view.
- Reduce the burden to network traffic and transmit more efficiently with Scan-to-URL, which stores the document on the Hard Disk Drive of the device. Recipients can then view and download the files from any Web browser.

Intuitive Tools to Maximize Efficiency.

The Savin suite of easy-to-use software utilities simplifies system management, monitoring and troubleshooting—everything needed to ensure smooth daily operation.

- Enable Web access to systems settings, address book, and much more, using the Web Image Monitor.
- Manage multiple connected Savin devices efficiently. The Web SmartDeviceMonitor allows centralized configuration, monitoring and management.
- Allow IT to query the device for important system reports, regardless of location, using On-demand Status E-mail Notification.
- Maximize uptime. Auto E-mail Notification sends a report to a designated e-mail address when the machine is not operating at optimum performance levels; for instance, when the toner is low.

Auto e-mail notification



Administrators can configure auto e-mail notification for up to 4 groups.

Scan-to-URL

Scan-to-URL improves information sharing in your organization while minimizing network traffic.

More Productive Printing.

The Savin 9040b & 9050b systems work seamlessly with today's most popular operating systems and print drivers.

- Accept data from Windows®, AS/400, Linux, Macintosh® and Novell® for seamless integration with a variety of network operating systems.
- Finish documents quickly via an icon-based Graphical User Interface using the Refined Print Command Stream (RPCS) print driver.
- Output documents generated from the most common business applications with PCL5e/6 print drivers or genuine Adobe® PostScript® 3™.
- Reorder print and copy jobs according to the most pressing priorities with the Job Function List.
- Use PDF Direct Print to print PDFs quickly without opening an application and slowing down your network.
- Improve security by password protecting your print files until you release them right at the system. You can even print and delete multiple documents in a single operation.

Time- and Money-Saving Fax Features.

Fax more conveniently and economically with these innovative fax capabilities:

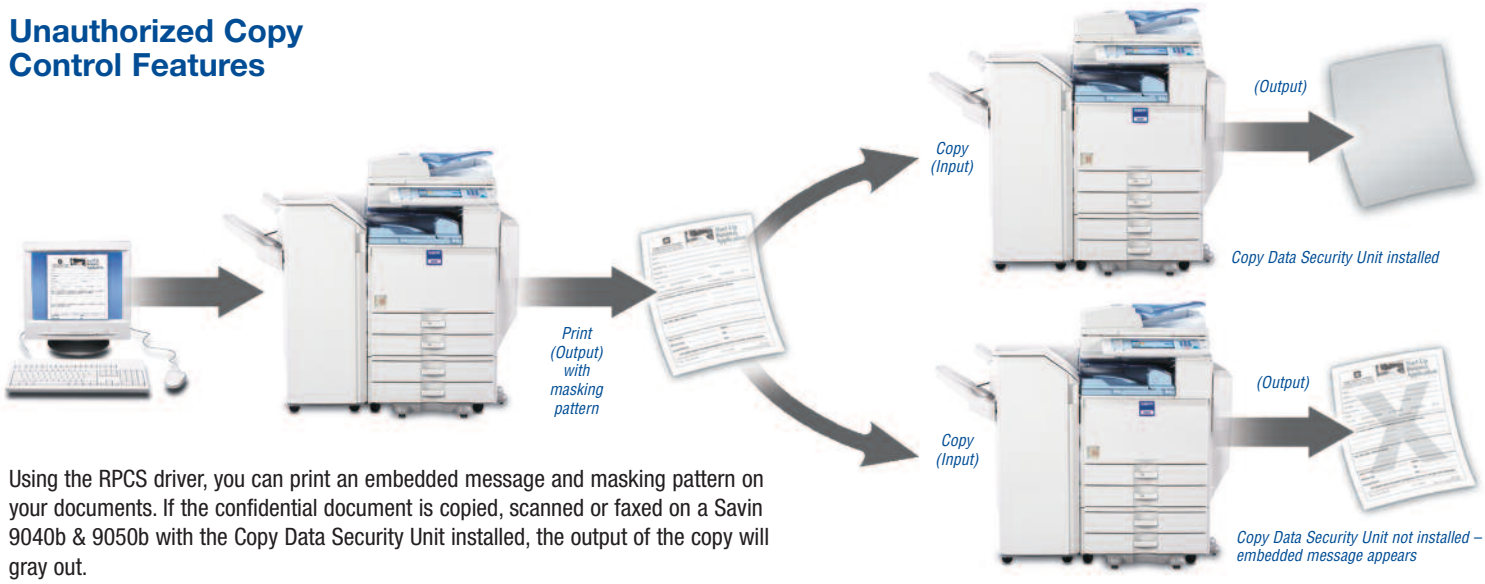
- Send hard copies at a quick 2 seconds per page on up to three analog lines via the Super G3 Modem and standard JBIG compression.
- Save time and paper with LAN fax and send faxes right from your desktop.
- Capitalize on the cost-saving benefits of IP faxing (T.38) for fast, high quality communication: send and receive faxes directly over your LAN or WAN, bypassing your PSTN (Public Switched Telephone Network).
- Deliver inbound faxes quickly by automatically forwarding them to e-mail addresses or network folders. Recipients receive an automatic e-mail notification of fax deliveries.

Security Every Step of the Way.

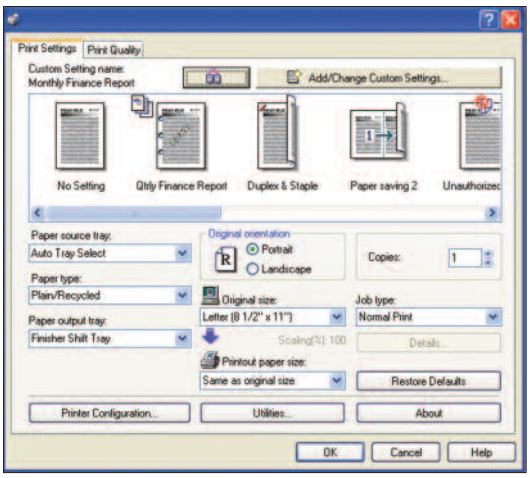
Sophisticated security features protect not only you, but also your customers, business partners and employees with the Savin 9040b & 9050b.

- Prevent unauthorized access to system functions with Windows/LDAP/Kerberos authentication, which requires a valid user name and password.
- Ensure unauthorized documents are never duplicated with the optional Copy Data Security Unit, which grays-out text when copied.
- Protect temporary data stored on the Hard Drive with DataOverwriteSecurity, which overwrites latent copy, print, scan, fax and Document Server data.
- Protect address book data with Encrypted Address Book, which protects data even if the built-in hard drive is removed, disposed of or stolen.
- Secure Internet Protocol (IP) communication by authenticating and/or encrypting each IP packet in a data stream with IPsec Communication and transmit PDFs securely with Encrypted PDF Transmission.
- Encrypt Hard Disk Drive and non-volatile RAM data immediately upon storage with the HDD Data Encryption.

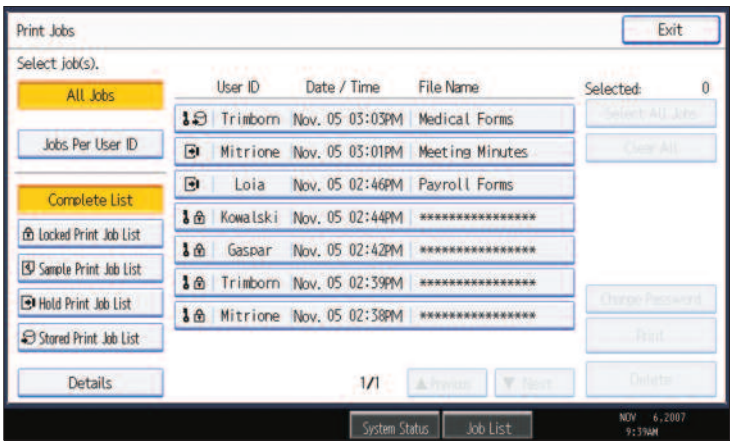
Unauthorized Copy Control Features



Using the RPCS driver, you can print an embedded message and masking pattern on your documents. If the confidential document is copied, scanned or faxed on a Savin 9040b & 9050b with the Copy Data Security Unit installed, the output of the copy will gray out.



Process jobs quickly and easily when you save special settings with the Refined Print Command Stream icon-based print driver.



The Hold/Locked/Stored Print functions let you hold your documents securely in the device until you're ready to print them.

Technology to Empower Your Business.

@Remote

At Savin, we're committed to helping you achieve your goals for reducing overall Total Cost of Ownership, optimizing fleet management and ultimately increasing employee productivity. The @Remote Intelligent Management System is a powerful tool that offers Device Management solutions for…

- Automating service call procedures, eliminating the need for end-users to initiate service calls. If a service call is required, the @Remote network appliance automatically places a request for service—including detailed and accurate diagnostic information.
- Upgrading and adjusting your devices via remote firmware applications, which means that your devices will always be functioning within the most current and productive operational parameters.
- Ensuring that your devices are constantly up and running by sending alerts, such as low toner warning.

User-Friendly Accessibility.

The Savin 9040b & 9050b systems not only give you more functionality, but also make their powerful features more accessible to all users.

- Open and close paper trays effortlessly with overhand/underhand grips.
- Increase readability with the Simplified Display.

Open Architecture.

Embedded Software Architecture

The Savin Embedded Software Architecture—an innovative Java (J2ME-compatible) software development platform—allows for the development of key applications that run on the Savin 9040b & 9050b.

- Dramatically enhance your organization's workflow.
- Customize to meet your needs by controlling features such as the operation panel, printing, saving files and scanning.

Your Environmental Partner

Savin continues its long-standing commitment to developing office solutions with environmentally friendly and superior energy- and supply-saving features, without compromising productivity.

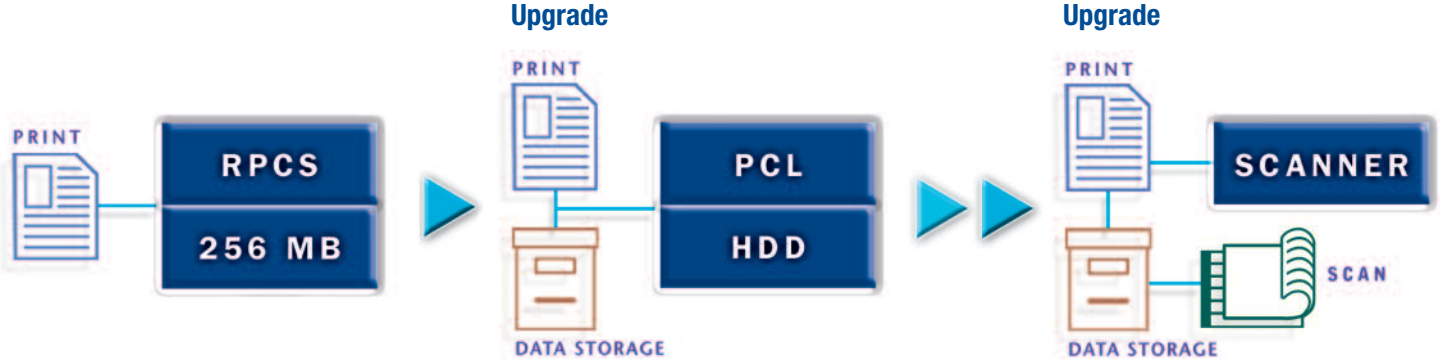
Flexible Upgrade Path (9040b/9050b)



For a low-cost network printer, where a specific printer language is not required, start with Savin's RPCS printer unit.

For the next step up, add the Printer Enhance and get PCL printing and document storage capabilities.

For a device that can send cost-free documents electronically anywhere in the world, simply add the Scanner Enhance for black & white scanning.

For an all-inclusive solution, a Printer/Scanner Kit is also available.
